## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1 – 9, drawn to a method to produce a fiber mat.

Group II, claim 10, drawn to a fiber mat.

Group III, claim 11, drawn to a use for the mat.

2. The inventions listed as Groups I - III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claim 10 is either obvious or anticipated by EP 98/01611. Accordingly the special technical feature linking the two claims, the method of pre-treating the fibers as they are harvested, does not provide a contribution over the prior art and no single general inventive concept exists. Therefore, restriction is appropriate. As claim 11 is not directed to a statutory category of invention, it cannot provide a contribution over the prior art.

3. Due to the complexity of the restriction a written restriction was issued.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
